Contents Volume 410

Tenth Special Issue (Part 2) on Linear Algebra and Statistics

S. Puntanen, G.P.H. Styan and H.J. Werner
Preface 1

O.M. Baksalary and G.P.H. Styan
Some comments on the life and publications of Jerzy K. Baksalary (1944–2005) 3

T. Caliński
On some of Jerzy Baksalary's contributions to the theory of block designs 54

J.K. Baksalary and O.M. Baksalary
An invariance property related to the reverse order law. 64

T. Steerneman and F. van Perlo-ten Kleij
Properties of the matrix $A - XY^*$ 70

E. Frauendorf, H. Neudecker and G. Trenkler
Multivariate data, the arithmetic mean and exchangeability of transformations. 87

W. Hazod
Normalisers and centralisers of compact matrix groups. An elementary approach 96

E. Meijer
Matrix algebra for higher order moments. 112

J.K. Merikoski and R. Kumar
Lower bounds for the numerical radius 135

G. Trenkler and S. Puntanen
A multivariate version of Samuelson's inequality 143

J. Benítez and N. Thome
Characterizations and linear combinations of k-generalized projectors 150

L. Pronzato, H.P. Wynn and A. Zhigljavsky
Kantorovich-type inequalities for operators via D-optimal design theory 160

V.M. Raats, B.B. van der Genugten and J.J.A. Moors
Multivariate regression with consecutively added dependent variables 170

A.M. Mathai and S.B. Provost
Some complex matrix-variate statistical distributions on rectangular matrices. 198

Table of Contents continues

Table of Contents continued

J.J. Hunter
Stationary distributions and mean first passage times of perturbed Markov chains 217
R.W. Farebrother and G. Trenkler
On generalized quadratic matrices 244
K. Balasubramanian and M.I. Beg
Three isomorphic vector spaces—II 254
Y. Takane and H. Yanai
On the Wedderburn–Guttman theorem 267
C. Stępniak
Matrix equations with restraints and their statistical applications . . . 279
